PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/593,003	Applicant(s) KIM ET AL.	
	Examiner Russell D. Stormer	Art Unit 3617	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-4 is/are pending in the application.
- 4a) Of the above claim(s) ____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) ____ is/are allowed.
- 6) ☒ Claim(s) 1-4 is/are rejected.
- 7) ☐ Claim(s) ____ is/are objected to.
- 8) ☐ Claim(s) ____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☒ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on ____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All b) ☐ Some * c) ☐ None of:
1. ☒ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. ____.
 3. ☒ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Specification

The abstract of the disclosure as filed on September 14, 2006 is objected to because in line 10, it appears that the word "remarkably" should be changed to - - markedly- - inasmuch as the specification does not describe the reduction in maintenance time and expense as being "remarkable."

Correction is required. See MPEP § 608.01(b).

The disclosure is objected to because of the following informalities:

The reference character 11, shown in figure 4, is not described in the specification.

On page 5 of the specification, in line 1 the term "embodiments" should be changed to - -embodiment- - because only one embodiment is disclosed. In lines 11 and 12, it is not clear how many connection cores 1 are being described. Are there a pair of (two) cores 1 at each end of the track unit, or is there only one connection core 1 at each end?

On page 6, in line 1 layers of fibers and iron cores are described as being inserted into each rubber molding. Since these iron cores do not appear to be shown in the drawings, and the specification is silent as to what comprises the rubber molding, the specification is non-enabling for the track or rubber molding including iron cores, and it is not clear how a track might have both the steel cores 2 and the iron cores.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1 it is not clear if the "rubber" in line 4 is the same as the "rubber track" of line 1.

In claim 2 there is no antecedent basis for the "both sides" and the "leading ends" of the connection cores. Further, the claim lacks antecedent basis for the "both sides" and the "surfaces that face each other."

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Fukushima (Japanese Published Application 04-133878).

Fukushima discloses a separable rubber track comprising a plurality of segments (figure 6) each comprising a plurality of steel cores 12 for engaging a sprocket, a pair of connection cores 20 disposed at the ends of the segments and connected to the steel

Art Unit: 3617

cores (at least through the rubber track), and coupling members comprising a top 33 and a bottom 35. The connecting cores include pins 23 rotatably received by the coupling members in grooves 32 to connect the ends of adjacent segments. The coupling members 33, 35 are fastened together using bolts 38.

The intended use of the track, such as on a tank, is given no patentable weight.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The references show other track connections.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Russell D. Stormer whose telephone number is (571) 272-6687. The examiner can normally be reached on Monday through Friday, 9 AM to 4 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Joseph Morano can be reached on (571) 272-6684. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
